**EOS imaging ANNOUNCES 350TH SYSTEM WORLDWIDE INSTALLED AT
UNIVERSITY OF MISSOURI HEALTH CARE**

Paris, November 12, 2019 – EOS imaging (Euronext, FR0011191766 - EOSI - Eligible PEA - PME), a leader in 2D/3D orthopedic medical imaging and software solutions for 3D anatomical modeling and surgical planning, today announced that the EOS® system has been installed at [MU Health Care's](#) Missouri Orthopaedic Institute, the most comprehensive orthopedic surgery center in mid-Missouri. The installation marks the 350th system installed worldwide.

The [Missouri Orthopaedic Institute](#) is central Missouri's largest freestanding orthopedic center, designed and built with the needs of orthopedic patients as its central focus. The center specializes in sports medicine, pediatrics, general orthopedics, hip and knee, spine and trauma care. The installation of the EOS system provides patients full-body, weight-bearing 2D/3D imaging at a radiation dose 50% to 85% less than digital radiology exams and 95% less than basic CT scans.

Mike Lobinsky, Chief Executive Officer of EOS imaging, commented, “We are proud to announce that our 350th global system installation was achieved at Missouri Orthopaedic Institute and believe our technology complements the institute’s dedication to ensuring patients receive leading-edge care. Our growing installed base in the United States and worldwide reflects the endorsement of our unique technology by healthcare providers dedicated to osteo-articular care. We will continue to deploy our low dose 2D/3D imaging solution to ensure more and more patients can benefit from it.”

ABOUT EOS imaging

EOS imaging is a global medical device company that designs, develops and markets innovative, low dose 2D/3D full body and weight-bearing imaging, rapid 3D modeling of EOS patient X-ray images, web-based patient-specific surgical planning, and integration of surgical plan into the operating room that collectively bridge the entire spectrum of care from imaging to post-operative assessment capabilities for orthopedic surgery. With a primary focus on hips, knees, and spine, EOS imaging is targeting a \$2 billion annual market opportunity. EOS imaging has approximately 350 system installations in more than 30 countries generating more than 1 million patient exams annually. In FY 2018, the company reported revenue of €35.4 million. EOS imaging has corporate locations in U.S., France, Canada, Germany, and Singapore, and engages more than 175 employees. For additional information, please visit www.eos-imaging.com.

EOS imaging is listed on Compartment C of Euronext Paris
