

## EOS® Imaging System Installed at Meijo Hospital in Japan

*Country's leading institution for spine surgery  
is one of four Japanese hospitals now using the EOS system*

**Paris, April 22, 2014** - EOS imaging (Euronext, FR0011191766 – EOSI), the pioneer in 2D/3D orthopaedic medical imaging, today announced the installation of the EOS® imaging system in Japan's leading spine medical center at Meijo Hospital in Nagoya. The installation is one of the four installations of EOS in Japan since the equipment has received market clearance.

Japanese adoption of the EOS system began in December 2013 with a first installation at Niigata Spine Surgery Center (NSSC) following regulatory approval by the Japanese authorities. The current installation at the Meijo Hospital, affiliated to the Nagoya University Hospital, underscores the adoption of EOS by the best Japanese institutions for spine surgery. Meijo Hospital has the highest volume of deformative spine surgeries in Japan.

Professor Noriaki Kawakami, Director of Orthopedic Surgery at Meijo Hospital, said, *"Our hospital performs a vital role providing community health services throughout Japan. The installation of EOS in our facilities and throughout Japan is an important step in ensuring that our patients have access to the most beneficial imaging technology available."*

Marie Meynadier, CEO of EOS imaging, said, *"We are happy to report rapid adoption of the EOS system in Japan. The Meijo hospital and more globally our four installations demonstrate the positive results from our ongoing market development strategy in the Asia-Pacific region. We are confident that EOS adoption will continue in Japan, and throughout the region, as other physicians see the value of our technology demonstrated at these hospitals."*

For further information about the Company or EOS®, the first full body, low dose 2D/3D imaging system, please visit [www.eos-imaging.com](http://www.eos-imaging.com).

### About EOS imaging:

EOS imaging designs, develops, and markets EOS®, a revolutionary and patented medical imaging system, based on technology that enabled George Charpak to win the Nobel Prize for Physics. The Company is authorized to market the system in 32 countries, including the United States (FDA), Japan, Canada, Australia and the European Union (EU). Backed by an installed base of 75 sites and more than 400,000 imaging sessions, EOS® benefits from worldwide recognition within the global medical community. As of December 31, 2013 the Group posted 2013 consolidated revenue of €15.2 million and employed 101 people including an R&D team of 38 engineers. The Group is based in Paris and holds four subsidiaries in Besançon (France), Cambridge (Massachusetts), in Montreal (Canada) and Frankfurt (Germany), and offices in Singapore.
